PROFILE

Software Engineering graduate with a strong customer-centric mindset and a natural ability to bridge complex technology and real human needs. Skilled in building customer relationships, proactive problem identification, and clear technical communication. Experienced in 24/7 high-pressure operational environments, client-facing workflows, SLA management, and presenting products to diverse audiences.

PROFESSIONAL EXPERIENCE

NOC Technician · NGsoft (Staffed via RPT Technologies) Jan 2026 – Present

- Monitor and manage enterprise IT and communications systems in a 24/7 operations center serving multiple clients.
- Ensure service continuity and SLA compliance through rapid incident identification, escalation, and resolution.
- Hold an active Level 2 security clearance, required for the role.

Production Manager · A.L.T. Aluminum Ltd. 2014 – Dec 2025

- Served as primary point of contact for client accounts — customized production solutions and resolved conflicts to meet specific client needs.
- Built and maintained long-term client relationships through consistent communication, reliability, and a solutions-first approach.

Company Sergeant Major · IDF – Meitav Mitgaisim 2017 – 2019

- Led logistics and operational support for an IDF recruitment unit — recognized as outstanding soldier during basic training.

PROJECTS

KLiQ – Smart Shared Parking Platform — Capstone Project | React Native · TypeScript · Supabase · ESP32 · Arduino

- Co-built an end-to-end IoT parking solution with real-time gate control, mobile app, and cloud backend.
- Led product demos at an academic exhibition — communicated complex technical architecture to a non-technical audience, earning faculty recognition.

Wedding Budget Automation Suite — Google Apps Script · JavaScript · Google Sheets

- Identified workflow inefficiencies in a professional wedding producer's process — then designed and delivered a complete automation solution, now in live use.

WhatsApp Finance Bot — Node.js · Bot API · Excel Integration

- Built an automated financial assistant that syncs WhatsApp transactions to Excel using fuzzy search, with visual spending analytics.

EDUCATION

B.Sc. Software Engineering · Afeka Academic College of Engineering, Tel Aviv 2021–2026

- Coursework: Algorithms & Complexity, Information Security, Numerical Analysis, Software Engineering Methodologies.

SKILLS

Customer & CX: Customer Relationship Management · Client Retention · Account Management · Conflict Resolution · Customer Onboarding · Product Demonstration

Languages: Hebrew (Native) · English (Proficient)

Programming: JavaScript · TypeScript · Python · Java · C · SQL

Frameworks & Platforms: React Native · Node.js · Spring Boot · Docker · Git/GitHub · Linux · Supabase · Firebase · Arduino/IoT

Productivity: Microsoft Office (Word, Excel, PowerPoint) · Google Workspace · Postman

Soft Skills: Technical Storytelling · Cross-functional Collaboration · SLA Management · Proactive Problem Solving · Stakeholder Management
