PROFILE

B.Sc. Software Engineering student with customer-facing experience and a background in 24/7 technical operations. Experienced in understanding customer needs, resolving operational issues, coordinating solutions, and communicating technical information clearly to non-technical audiences. Seeking a customer-facing role in a technology company, with a focus on Customer Success, Customer Experience, and technical customer engagement.

PROFESSIONAL EXPERIENCE

NOC Technician | NGsoft (Staffed via RPT Technologies) | Jan 2026 - Present

- Monitor and manage enterprise IT and communications systems in a 24/7 operations center serving multiple clients.
- Identify, document, escalate, and follow incidents in line with SLA requirements to support service continuity.
- Hold an active Level 2 security clearance required for the role.

Production Manager | A.L.T. Aluminum Ltd. | 2014 - Dec 2025

Aluminum Manufacturing & Construction

- Served as a primary point of contact for customers, understanding project requirements, coordinating tailored production solutions, and resolving issues throughout the process.
- Built and maintained long-term customer relationships through consistent communication, expectation management, reliability, and a solutions-focused approach.

Company Sergeant Major | IDF - Meitav Mitgaisim | 2017 - 2019

- Led logistics and operational support for an IDF recruitment unit; recognized as an outstanding soldier during basic training.

PROJECTS

KLiQ - Smart Shared Parking Platform (Capstone Project)

React Native | TypeScript | Supabase | ESP32 | Arduino

- Co-built an end-to-end IoT parking solution with real-time gate control, a mobile app, and cloud backend. Led product demos to a non-technical audience.

Wedding Budget Automation Suite

Google Apps Script | JavaScript | Google Sheets

- Identified workflow inefficiencies in a professional wedding producer's process and designed an automation solution that is now in live use.

WhatsApp Finance Bot

Node.js | Excel Integration

- Built an automated financial assistant that syncs WhatsApp transactions to Excel using fuzzy search, with visual spending analytics.
